

2019 ieeec congress on evolutionary computation - cec 04 special session on games organized by jialin liu and daniel ashlock supported by ieeec cis games technical committee scope and topics games are an ideal domain to study computational intelligence ci methods because they provide affordable competitive dynamic reproducible environments suitable for testing new search algorithms pattern based evaluation methods or learning concepts, **a novel nature inspired algorithm for optimization** - 1 introduction optimization is the process of searching the best possible solution for a particular problem under given circumstances in recent years several real world complex optimization problems have emerged in various fields of engineering 1 2 business and economics which cannot be solved within adequate time or accuracy by classical methods, **amity school of engineering and technology** - amity school of engineering technology offers b tech in different streams, **a general heuristic for vehicle routing problems** - we present a unified heuristic which is able to solve five different variants of the vehicle routing problem the vehicle routing problem with time windows vrptw the capacitated vehicle routing problem cvrp the multi depot vehicle routing problem mdvrp the site dependent vehicle routing problem sdvrp and the open vehicle routing problem ovrp, **wsc 2011 proceedings informs sim** - simon taylor and mohammedmersin ghorbani brunel university tamas kiss and daniel farkas university of westminster navonil mustafee swansea university shane kite saker solutions stephen j turner nanyang technological university and steffen strassburger technical university of ilmenau, **ijat fuji technology press official site academic** - welcome to the official website of international journal of automation technology ijat focuses on advanced automation technologies ranging from basic techniques to a variety of applications meeting industrial requirements
